

The creative owner of this home is a self-described garage sale fanatic with a knack for spotting hidden treasures and giving them new life, often by working with creative carpenters and upholsterers. Enjoy the use of vibrant colour throughout this home, inspired partly by time the homeowners spent living in Mexico. Don't miss the charming three-season porches on both the left and right sides of the house — perfect for relaxing and watching the world go by.

Most items in this home have been purchased at garage sales and have been creatively restored and brought back to life! The homeowner was inspired by her mother, who would take her and her two samplings to garage sales regularly.
